

Approximation and Iterative Methods

An international conference in honor of Claude Brezinski

Lille, France, June 22-23, 2006

The conference will be organized on the occasion of the retirement of Claude Brezinski from the Lille University. The scientific program will consist of six invited lectures as well as of 10 invited 25-minutes talks.

TOPICS: Approximation theory, rational approximation, wavelets, curves and surfaces, convergence acceleration, Krylov subspace methods, systems of linear and nonlinear equations.
