

Publications of 2002 – 2022

1. Davydov Yu., Thilly E., (2002) Convex rearrangements of Gaussian processes. *Theory of Probab. and its Applications*, V. 47, 2.
2. Davydov Yu., Lifshits M., (2002) On the rate of approximation of local times for smooth random processes. *Theor. Probab. Math. Stat.* Vol. 66, p. 67–77.
3. Davydov Yu., Nagaev A., (2002) On two approaches to approximation of multidimensional stable laws. *J. Multivar. Anal.* Vol. 82, p. 210–239.
4. Davydov Yu., Nagaev A., (2002) Limit theorems and simulation of stable random vectors. *Limit Theorems in Probability and Statistics*, Balatonlelle, 1999, (I. Berkes, E. Csáki, M. Csörgo, eds.) János Bolyai Mathematical Society, Budapest, Vol. I, pp. 495–519.
5. Davydov Yu., Thilly E., (2002) Convex rearrangements of smoothed random processes. *Limit Theorems in Probability and Statistics*, Balatonlelle, 1999, (I. Berkes, E. Csáki, M. Csörgo, eds.) János Bolyai Mathematical Society, Budapest, Vol. I, pp. 521–552.
6. Davydov Yu., Zitikis R., (2002) Convergence of generalized Lorentz curves based on stationary ergodic random sequences with deterministic noise. *Statistics and Probability Letters.* Vol. 59, pp. 329–340.
7. Davydov Yu., (2002) Enveloppes convexes de processus gaussiens. *Annales I. H. Poincaré*, V. 38, 6, pp. 847–861.
8. Davydov Yu., Zitikis R., (2003) Generalized Lorentz curves and convexifications of stochastic processes. *J. of Applied Probability*, v. 40, 4, pp. 906–925.
9. Davydov Yu., Nagaev A., (2004) On the role played by extreme summands when a sum of i.i.d. random vectors is asymptotically α -stable. *J. Appl. Probab.* V. 41, pp. 437–454.

10. Davydov Yu., Zitikis R., (2004) Convex rearrangements of random elements. Fields Institute Communications, V. 40, pp. 141-171.
11. Davydov Yu., Paulauskas V., (2004) Recent results on p -stable convex compact sets with applications. Fields Institute Communications, V. 40, pp. 127-139.
12. Davydov Yu., Zitikis R., (2005) An index of monotonicity and its estimation: a step beyond econometric applications of the Gini index. Metron - Intern. J. of Stat. V. VXXIII, N 3, pp. 351-372.
13. Davydov Yu., Breton J-Ch., (2005) Théorème limite local pour le sup de processus empiriques pour des variables aléatoires i.i.d. Liet. Matem. rink.,45, pp. 457-478.
14. Davydov Yu., Egorov V. A., (2006) On convergence of empirical point processes. Stat. and Probab. Letters. V. 76, 17, pp. 1836-1844.
15. Davydov Yu., Zitikis R., (2007) Deterministic noises that can be statistically distinguished from the random ones. Stat. Infer. for Stoch. Proc., V. 10, pp.165-179.
16. Davydov Yu., Illig A., (2007) Mixing properties of geometrical crystallization processes. CRAS, 345, pp. 583-586.
17. Davydov Yu., Khoshnevisan, D., Shi, Z. and Zitikis R., (2007) Convex rearrangements, generalized Lorenz curves, and correlated Gaussian data. Journal of Statistical Planning and Inference, 137 , 915-934.
18. Bebbington, M., Davydov Yu., and Zitikis R., (2007) Estimating the renewal function when the second moment is infinite. Stochastic Models, 23, 27-48.
19. Davydov Yu., Tilly E., , (2007) On convex rearrangements of Lévy processes. ESAIM: Probab. and Statist., 11, pp. 161-172.
20. Davydov Yu., Breton . J-Ch., (2007) Local invariance principle for i.i.d. random variables. Theor. Probab. and Appl. V. 51, 2, pp. 256-278.
21. Davydov Yu., Paulauskas V., (2008) On estimation of parameters for spatial autoregression model. Stat. Infer. for Stoch. Proc. V. 11, 3, pp.221-325.
22. Davydov Yu., . Rotar V., (2008) On a non-classical invariance principle. Stat.Probab.Letters, V. 78, 14, pp. 2031-2038.

23. Davydov Yu., Molchanov I. and Zuev S., (2008) On strictly stable laws on convex cones. *EJP*, V 13, pp. 259–321.
24. Davydov Yu., Zitikis R., (2008) On weak convergence of random fields. *Ann.Inst.Stat.Math.* V. 60 (2), pp. 345–365.
25. Davydov Yu., Rotar V., (2009) On asymptotic proximity of sequences of probability measures. *J. Teor. Probab.*, V. 22, 1, pp. 82–98.
26. Davydov Yu., Illig A., (2009) Ergodic properties of crystallization processes. *Journal of Mathematical Sciences*, V. 163, 4, pp. 375–381.
27. Davydov Yu., Banys P. and Paulauskas V., (2010) Remarks on SLLN for linear random fields. *Statistics and Probability Letters*, V. 80, 5-6, pp.489–496.
28. Davydov Yu., Nagaev A. and Philippe A., (2010) On peeling procedure applied to a Poisson point process, *Adv. in Appl. Prob.*, v.42, 3, pp. 620–630.
29. Davydov Yu., Stoica R. S., Liu S., Fouchard M., Vienne A. and Valsecchi G.B., (2010) Order statistics and heavy-tailed distributions for planetary perturbations on Oort cloud comets. *Astronomy and Astrophysics.* , 513, A14, pp. 1–9.
30. Davydov Yu., Lachieze-Rey R., (2011) Rearrangements of Gaussian fields, *Stochastic Processes and their Applications*, 121, pp. 2606-2628.
31. Davydov Yu., (2011) On convex hulls of Gaussian samples. *Lithuanian Mathematical Journal*, Vol. 51, No. 2, pp. 171-179.
32. Davydov Yu., Molchanov I. and Zuev S., (2011) Stability for random measures, point processes and discrete semigroups. *Bernoulli*, V. 17, 3, pp. 1015-1043.
33. Davydov Yu., (2011) Remark on locally constant self-similar processes. *POMI seminars*, v. 396, pp. 88-92. (see also *J.Math.Sci.*, 188, 6, pp. 686-688.)
34. Davydov Yu., (2012) On convex hull of d-dimensional fractional Brownian motion. *Statistics and Probability Letters*, 82, No. 1, pp. 37-39.
35. Davydov Yu., Dombry C., (2012) On the convergence of Le Page series in Skohorod space. *Statistics and Probability Letters*, 82, pp. 145-150.

36. Davydov Yu., Dombry C., (2012) Asymptotic behaviour of the convex hull of a stationary Gaussian process.
Lithuanian Mathematical Journal, 52, 4, pp.363-368.
37. Davydov Yu., Paulauskas V., (2013) A simple approach in limit theorems for linear random processes and fields with continuous time. Theory Probab. Appl. 57-4, pp. 589-606.
38. Davydov Yu., Paulauskas V., (2014) On the asymptotic form of convex hulls of Gaussian fields. Central European J. of Mathematics, 12(5), pp. 711–720.
39. Davydov Yu., Dombry C., (2014) Convex hulls of regularly varying processes. Journal of Mathematical Sciences: 199, 2, Page 150-161. (see also: POMI seminars, 408, pp. 154-174.)
40. Davydov Yu., Coupier D., (2014) Random symmetrizations of convex bodies. Adv.Appl.Prob., 46, 3, pp. 603-621.
41. Davydov Yu., (2015) On convex hull and winding number of self-similar processes. Zap. Nauchn. Sem. POMI, 441, pp. 154–162.
42. Davydov Yu., Illig A., (2015) Mixing properties of crystallization processes.
North-Western European Journal of Mathematics, 1, pp. 169-191.
43. Davydov Yu., Ibragimov, I. A. ; Leonov, G. A. ; Nikitin, Ya. Yu. ; Petrov, V. V., (2016) On the 60th birthday of Mikhail Anatolievich Lifshits. (Russian) Vestn. St.-Peterbg. Univ. Ser. 1. Mat. Mekh. Astron. 3(61), no. 4, pp. 694–695.
44. Davydov Yu., (2017) On distance in total variation between image measures. Statistics and Probability Letters, Vol 129, pp. 393–400.
45. Davydov Yu., Random walks in non homogeneous Poissonian environment. in : Modern problems of stochastic analysis and statistics - Selected contributions in honor of V. Konakov, Vol. 208, (2017), Heidelberg : Springer, pp. 3-24. (coll. V. Konakov)
46. Davydov Yu., Zitikis R.. (2017) Quantifying non-monotonicity of functions and the lack of positivity in signed measures. Modern Stochastics: Theory and Applications, Vol. 4, N. 3, pp. 219–231.

47. Davydov Yu., Paulauskas V., (2018) Lamperti type theorems for random fields. *Theory Probab. Appl.* 63-3, pp. 520-544.
48. Davydov Yu., Chen L., Gribkova N., Zitikis R., (2018) Estimating the index of increase via balancing deterministic and random data. *Mathematical Methods of Statistics*, V. 27, no. 2, pp. 83–102.
49. Borodin A. N., Davydov Yu., Nevzorov V. B., (2018) To the history of Saint-Petersburg school of probability and statistics. III *Vestnik SPbU*, V. 5, no.4, pp. 572–596. (Functional distributions, stochastic geometry and extrema).
50. Davydov Yu., Greselin F., (2019) Inferential results for a new measure of inequality. *The Econometrics Journal*, V. 22, 2, pp. 153-172.
51. Davydov Yu., Paulauskas V., (2019) Remarks on countable zonotopes. *Statistics and Probab. Letters*, V. 153, pp. 187-191.
52. Davydov Yu., Moldavskaya E., Zitikis R., (2019) Searching for and quantifying non-convexity of functions. *Lithuanian Mathematical Journal*, v. 59, pp. 507-518.
53. Davydov Yu., Kaim M., (2019) Absolute continuity and local limit theorems for homogeneous functionals of point processes. *Lithuanian Mathematical Journal*, v. 59, pp. 498-506.
54. Davydov Yu., Greselin F., (2020) Comparisons between poorest and richest to measure inequality. *Sociological Methods and Research* vol. 49(2), pages 526-561.
55. Davydov Yu., Novikov S., (2021) Remarks on asymptotic independence. *Theor. Probab. Appl.* Vol. 66, No. 1, pp. 55-72.
56. Davydov Yu., Greselin F., (2021) Inferential results for a new inequality curve. *Math. methods of statistics*. Vol. 30, No. 1–2, pp. 1–15.
57. Davydov Yu., (2021) Limit theorems for “random flights”. *Zap. Nauchn. Sem. POMI*, 501, pp. 149–159.
58. Davydov Yu., Paulauskas V., (2022) More on the convergence of Gaussian convex hulls. *Zap. Nauchn. Sem. POMI*, Vol. 510, pp. 87–97.
